Current Occupation:

Full-time faculty, Assistant Professor, Department of Finance and Institute of Financial Management, Nan Hua University (2013/8~Now)

Brief introduction:

I'm a college teacher who teaches for more than 18 years in university. I enjoy myself in doing research and teaching in my academic life. I have taught for over eighteen years in University since 1999. Most of my students work in financial institutions, insurance companies and stock markets. In the meanwhile, I also acted as a financial/strategic consultant in four medium-sized enterprises since March, 2009. I expect that there are two main academic directions to do subsequent research in the future. In addition, I'm also a Buddhist and was converted to Venerable Master Hsing Yun who founded Fo Guang Shan (FGS) in 1967, Taiwan. I joined FGS relative activity since 1983. According to my past learning experiences in FGS, I always believe in one thing that "Where there is Dharma, there is a way."

I was proud of being a contributor in international finance research community and also provided more effective research outcomes connected with governmental policies and academic institutions. I always provide advice and telling companies how to manage their businesses well and avoid risks and assist owners and chief executive officers with financial

management and risk-control managements;in addition, providing advisory and useful suggestions to the investors and decision makers.

Up to now, there're totally fifteen textbooks published including six professional financial publications and five local textbooks and four foreign textbooks had been published since 2004. I enjoy myself in doing research and expect to get more good quality papers published in SSCI/SCI high impact factor journals in the coming future. I still make the best of time to move forward and contribute my research to academic community in academic field.

The following statement is my life philosophy

"Learn from yesterday, live for today, hope for tomorrow."

Benjamin Franklin began and ended each day with a question: "What good shall I do this day?" in the morning, and "What good have I done this day?" in the evening. In fact, many great thinkers embraced the idea of constantly questioning things. As Albert Einstein reportedly said, "Learn from yesterday, live for today, hope for tomorrow. The important thing is not to stop questioning and learning."

Of course, getting into the habit of self-reflection is easier said than done, as we often prefer to avoid asking ourselves the tough questions. As philosopher and psychologist John Dewey explained in his 1910 book, "How We Think," reflective thinking involves overcoming our predisposition to accept things at face value and the willingness to endure mental unrest. But enduring this discomfort is well worth the effort, as it can result in the confidence boost necessary to perform better in our work and daily lives.

I always think about the following question everyday, 'If today were the last day of my life, would I want to do what I am about to do today?' Actually, I have no depressed emotion in my real life because I am always optimistic and open-minded to face everything or challenges.

I have two expectations in my academic life. First of all, hoping to revisit and reevaluate the applicability of existing research to connect theories in light of the changing conditions of global business that might have invalidated their boundary conditions and assumptions. Secondly, I hope to generate novel theoretical ideas and

empirical integrated model that better reflect the dynamics of a post-crisis world and provide relevant and timely knowledge to global managers and companies as well as to policy makers, governments, and all other participants in the global economy.

Main Research Field

Dr. Chao's current main research is focused in five main fields,

1. International Diversification and FDI Investment Policy
2. MNE FDI Strategy and Global Strategy
3. Evaluating MNE Investment Strategy and Performance in Emerging Economy

china/isbn/978-3-330-82095-1

Published date:13-February-2017

ISBN: 978-3-330-82095-1

Blurb/Short text:

This book mainly assesses the joint effects of diversification configuration on MNE performance and systematic risk. Findings suggest that their joint effects are curvilinear on performance and systematic risk. Furthermore, low level of region and moderate level of country diversification shows significant positive effect on MNE performance and negative effect on systematic risk. We construct the terminology "balanced configuration in geographical diversification" to identify averaging the balance of geographical diversification between country and region via moderate concentrated China involvement is the optimal strategic diversification strategy to gain better performance and have lower risk.

In addition, I have also published five University finance-related textbooks from 2004.

1. The book "Monetary Theory and Policy" was published in 2004
2. The book "Principles of Insurance" was published in 2005
3. The book "Financial Planning Theory and Practice" was published in 2010
4. The book "International Trade Theory and Practice" was published in 2012
5. The book "Insurance Practice and Case-study Analysis" was published in 2013
